SI Simple Forms

Privacy & Data Guide

Version: 1.0.0

Introduction

Thank you for choosing **SI Simple Forms**.

This document explains how the plugin collects, stores, processes, and manages data. It also describes available privacy features and data retention options.

SI Simple Forms has been designed to follow WordPress best practices while giving website owners full control over their data.

Data Collected

Depending on how the plugin is configured, SI Simple Forms may collect the following information.

Contact Forms

- Name
- Email Address
- Subject
- Message
- Submission Date & Time

Optional

- IP Address (if enabled)
- Browser/User Agent (if enabled)

Subscription Forms

- Email Address
- Name (if included in the form)
- Subscription Date & Time

Data Storage

SI Simple Forms stores submitted data inside your WordPress database.

Examples include:

- Contact Messages
- Subscriber Records

No data is sent to external services unless an integration is enabled by the website administrator.

MailPoet Integration

When MailPoet integration is enabled:

- Subscribers are added to the selected MailPoet list.
- MailPoet manages newsletter delivery, confirmations, automations, and email campaigns.
- SI Simple Forms may also keep a local subscriber record for administrative purposes.

MailPoet has its own privacy practices and data handling policies.

Spam Protection

SI Simple Forms includes multiple layers of spam protection.

Supported features include:

- Honeypot Protection
- WordPress Security Nonces
- Server-side Validation
- Cloudflare Turnstile (Optional)

These features help prevent automated spam submissions without affecting legitimate users.

Data Retention

The administrator may configure how long submitted data is retained.

Available settings include:

- Contact Message Retention
- Subscriber Retention
- Automatic Deletion of Expired Records

These settings are available from:

Settings → Privacy & Data

Exporting Data

Administrators can export:

- Contact Messages
- Subscribers

Exported files are provided in CSV format for backup or reporting purposes.

WordPress Privacy Tools

SI Simple Forms is designed to work alongside WordPress privacy features.

Website owners are encouraged to use the built-in WordPress privacy tools for handling personal data requests where applicable.

Third-party Services

Depending on configuration, SI Simple Forms may integrate with:

MailPoet

Used for newsletter subscriptions and email marketing.

Cloudflare Turnstile

Used for spam protection and bot detection.

These services operate under their own privacy policies.

Security

SI Simple Forms follows WordPress development best practices.

Security features include:

- Input Sanitization
- Output Escaping
- Nonce Verification
- Server-side Validation
- Secure Database Operations
- Spam Protection

Uninstall Behaviour

By default, uninstalling the plugin does not automatically remove stored data unless the administrator chooses to delete plugin data.

Website owners should ensure they have exported any required information before removing the plugin.

Website Owner Responsibilities

The website administrator is responsible for:

- Publishing an appropriate Privacy Policy.
- Informing visitors how their information is used.
- Configuring data retention settings.
- Managing third-party integrations.
